SUMMARY

I am a final year CSE student at IIIT Kottayam (CGPA 9.96) who enjoys building things that actually ship - from a custom blockchain system to an LLM powered app builder. I have experience working with Python, Typescript, FastAPI and Next.js across the stack. I am comfortable with infra tools such as Docker, Kubernetes, AWS and Redis and I regularly solve DSA problems on LeetCode in Java.

EDUCATION

Indian Institute of Information Technology, Kottayam, Kerala

Aug 2023 - May 2027

B. Tech in Computer Science And Engineering | CGPA: **9.96/10**

Relevant Coursework : Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Computer Organization & Architecture, Object-Oriented Programming, System Design, Agile/Scrum Architecture.

SKILLS

Languages : Java, TypeScript, Python, JavaScript, C++, SQL, R

Frontend : Next.js, React.js, Tailwind CSS, Socket.io

Backend : FastAPI, Node.js, Express.js, REST APIs

Databases/ORM : PostgreSQL, MySQL, MongoDB, Supabase, NeonDB, Prisma, Redis

AI/ML : scikit-learn, NumPy, pandas, Matplotlib, Seaborn, Plotly, NetworkX, Gemini API

Tools/DevOps : Git, Docker, Linux, Postman, AWS (S3, EC2, VPC), GCP, CI/CD, GitHub Actions, Kubernetes, Terraform

WORK EXPERIENCE

[Ankbyte](#)

Remote

AI Engineering Intern (Backend Systems)

Feb 2026 - Mar 2026

- Replaced a manual form-based intake system with a full onboarding pipeline — integrating authentication (Better Auth), file upload, and knowledge-base storage (Cloudflare R2, PostgreSQL, Prisma).

[X-HUG.ai](#)

Remote

Front End Web Development Intern

Mar 2025 - July 2025

- Redesigned the company website, resolving cross-device layout inconsistencies and improving UI consistency which contributed to increased client engagement post-launch.

[Eldroga Life Sciences](#)

Remote

Freelance Web Developer

June 2025

- Solved the problem of CKD-specific diet chart inaccessibility by building a web app that generated personalised diet plans based on CKD stage, age, and medical conditions.
- Reduced physicians' manual diet planning effort by 70%** through an exportable chart feature, validated across **20+ CKD patient profiles spanning 5 disease stages and 3 age groups.**

PROJECTS

[ChainVerify](#) | A Digital Bill and Receipt Verification System | [\(Github\)](#)

March 2026

Tech Stack: Python, FastAPI, Next.js, TypeScript, Docker, Redis, PostgreSQL, Nginx, Cloudflare R2, WebSockets

- Built a custom blockchain where each document is fingerprinted using a composite SHA-256 hash (filename + raw bytes + extracted PDF text) and anchored via a Merkle tree into a dedicated blockchain microservice — batch-sealing blocks at 10 transactions or every 5 seconds, with Redis persisting chain state across restarts.
- Engineered a 6-service Dockerized architecture with Nginx rate limiting (5 req/s upload, 30 req/s API), Redis Pub/Sub broadcasting real-time events to an admin WebSocket dashboard, Cloudflare R2 for file storage, and OAuth-based access control via Google/GitHub — tamper detection without any third-party blockchain dependency.

[CodeKraft](#) | AI Powered Web App Builder | [\(Github\)](#)

Jan 2026

Tech Stack: Next.js, TypeScript, Docker, Prisma, PostgreSQL, Inngest, Google Gemini API, E2B Sandboxes, Clerk (Auth and Billing)

- Engineered an LLM-powered platform (Gemini API + E2B sandboxes) that converts natural language prompts into fully deployed Next.js apps in under 3 minutes, with automated dependency management inside isolated sandbox environments.
- Built a chat-like refinement loop where users can modify generated apps through follow-up prompts — each change updates the existing codebase incrementally with a saved version history and live preview, so no work is lost between iterations.

ACHIEVEMENTS AND CERTIFICATIONS

- Open Source Contributor:** GirlScript Summer of Code 2025 ([View Certificate](#)), Social Summer of Code 2025 ([View Certificate](#)); **10+ PRs merged** and contributed to AI-integrated MERN apps.
- All India Rank 2** in the ISC Board Examinations 2023, scoring **99.5%** and placing in the top 0.01% of over 100,000 candidates.
- LeetCode : 300+ problems solved in Java — earned 100 Days Badge 2024 and 50 Days Badge 2026.
- Machine Learning Foundations-Amazon (AWS Educate)-[View Badge](#)**

July 2025
